

Space Research Centre

XMM EPIC Cal-Ops Meeting

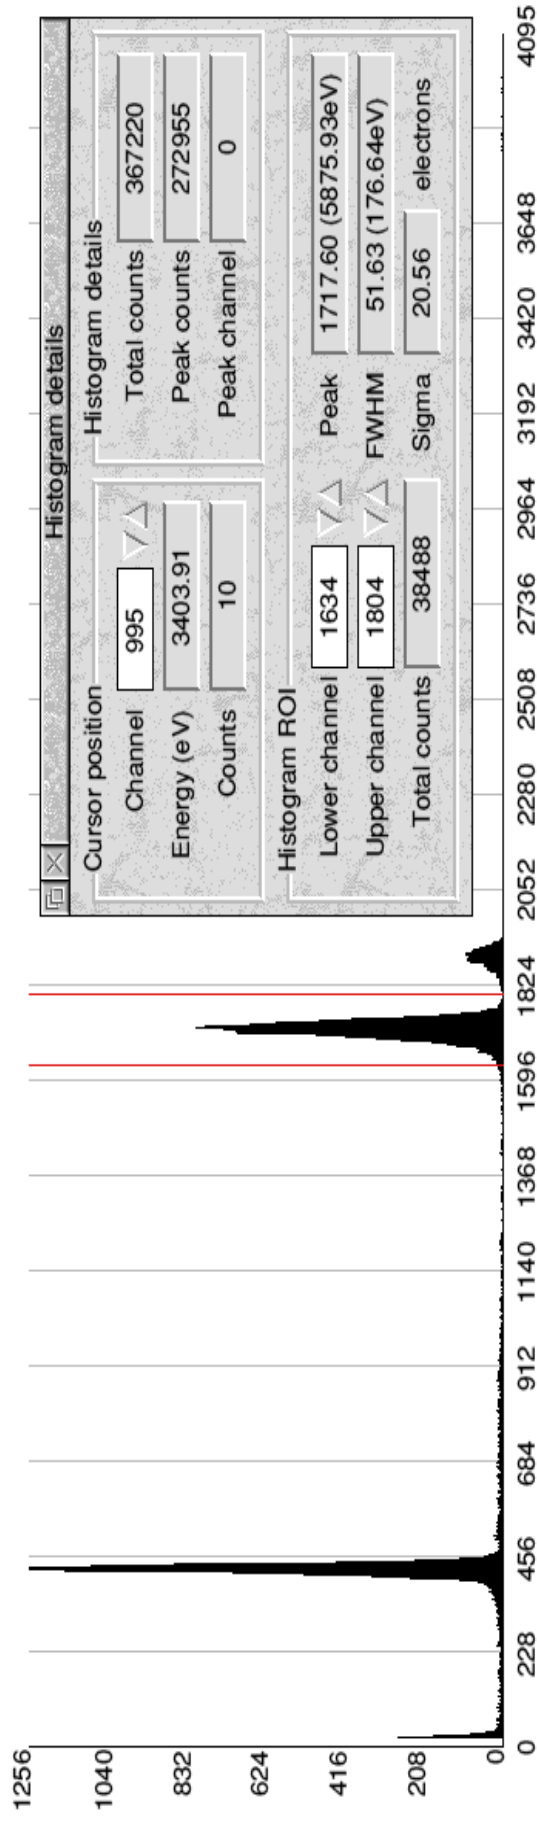

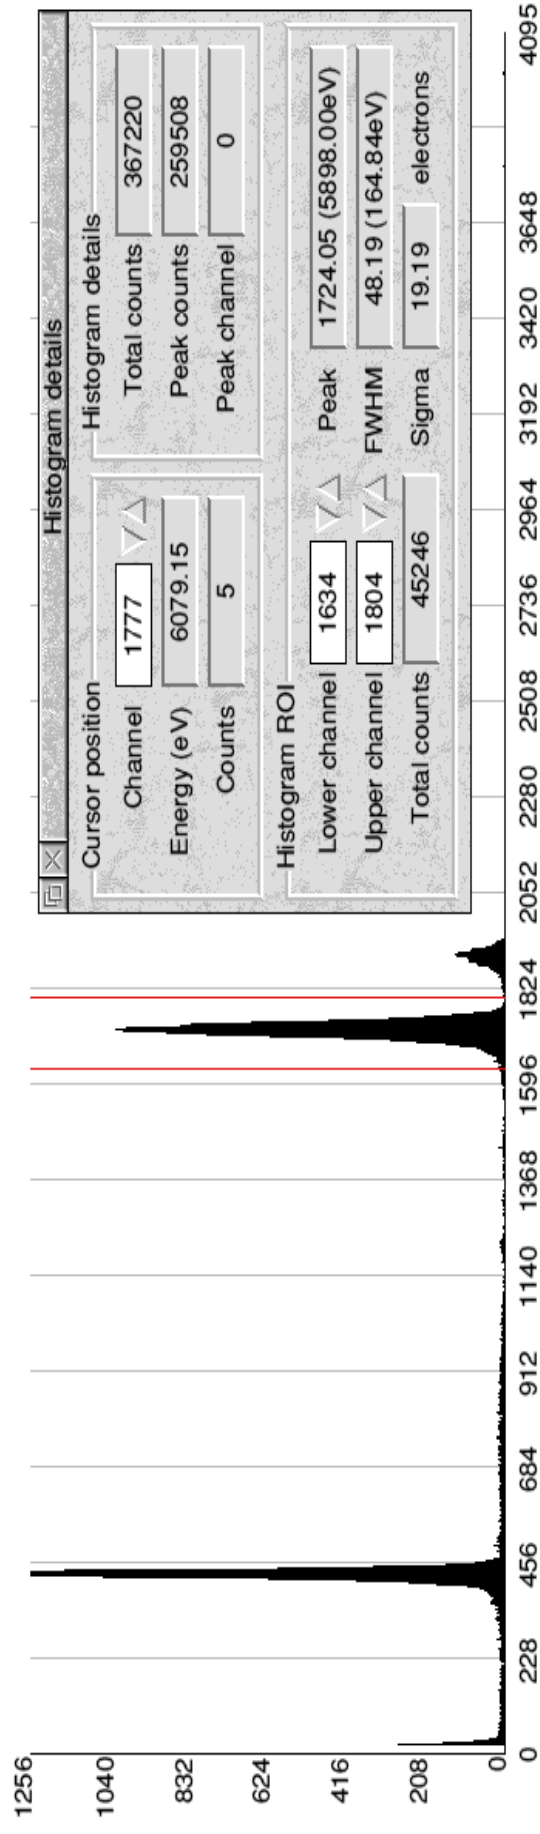

6 June 2001

Cooling of CCDs and Charge
Injection

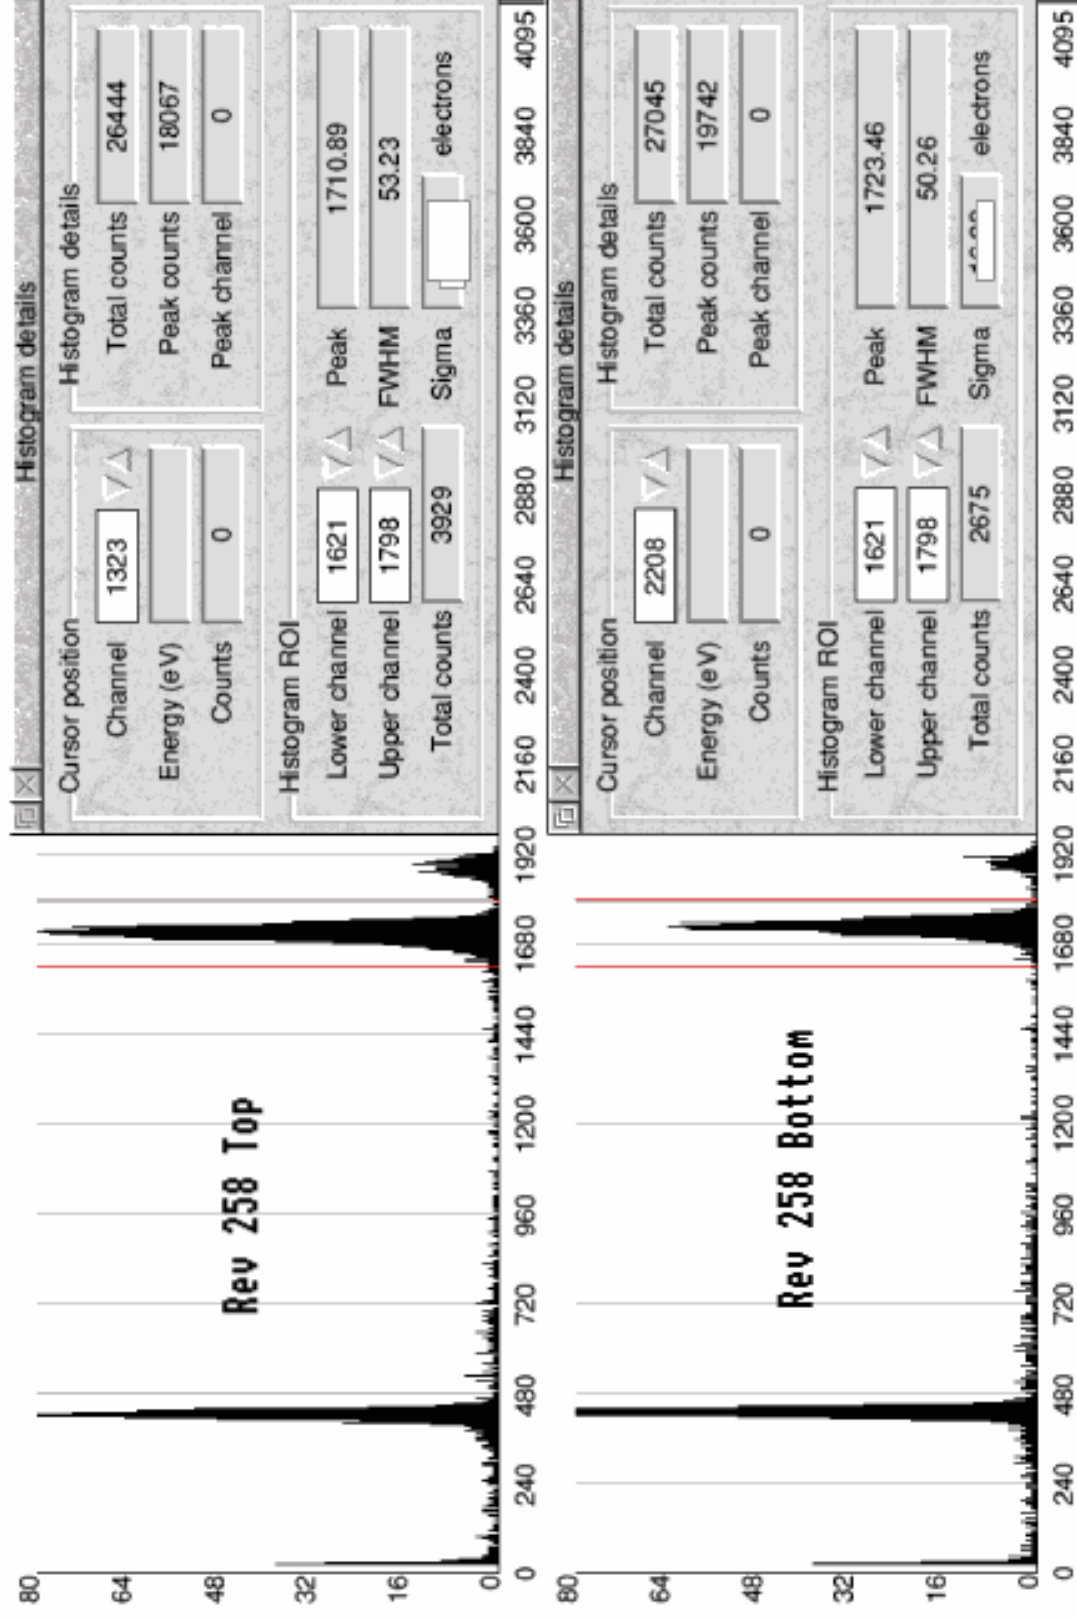

Tony Abbey - Leicester University

Comparison mono-pixel Mn ka FWHM closed cal full frame

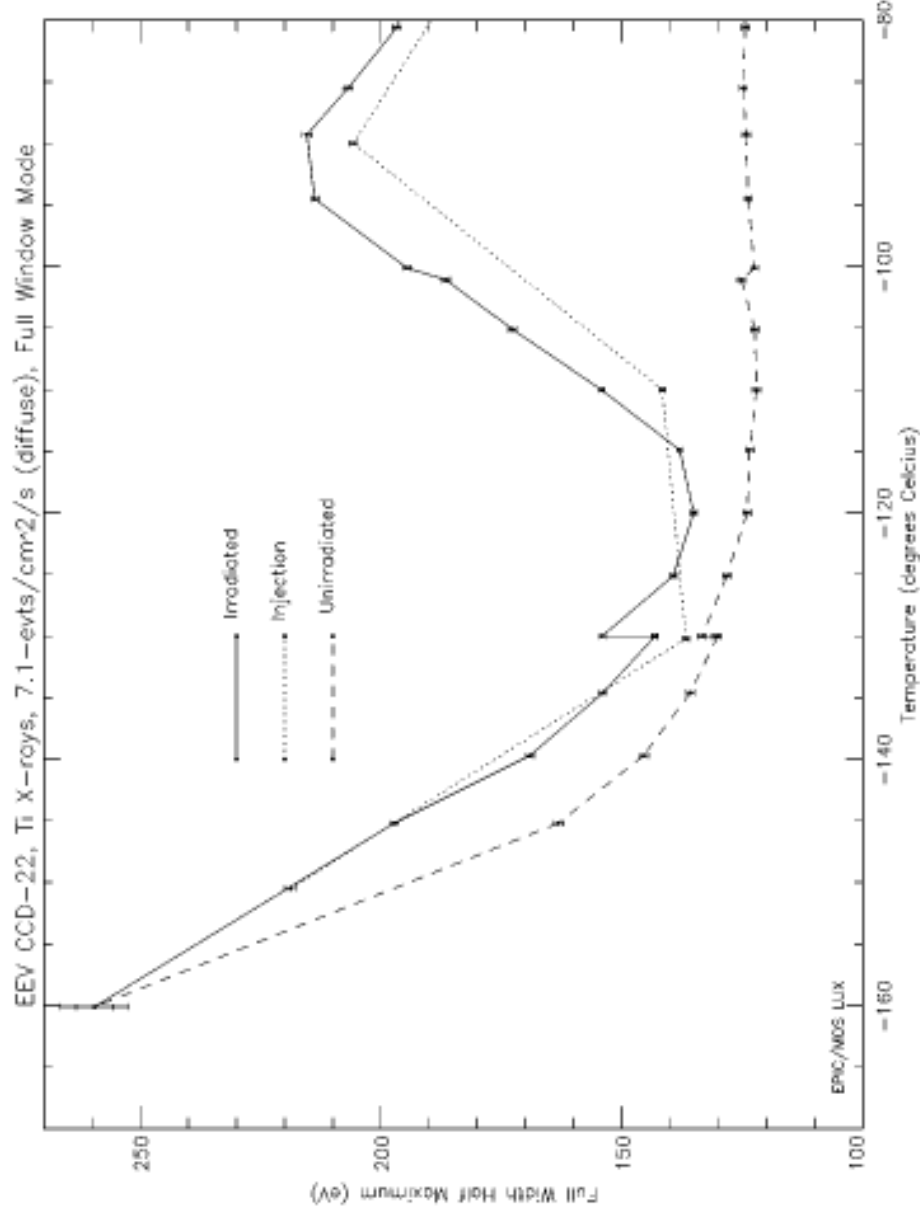

MOS2 CCD1 rev 55 to 258 using same 3.421 eV/ch cal

Comparison mono-pixel Mn ka FWHM closed cal full frame MOS2 CCD1 rev258 top and bottom of frame

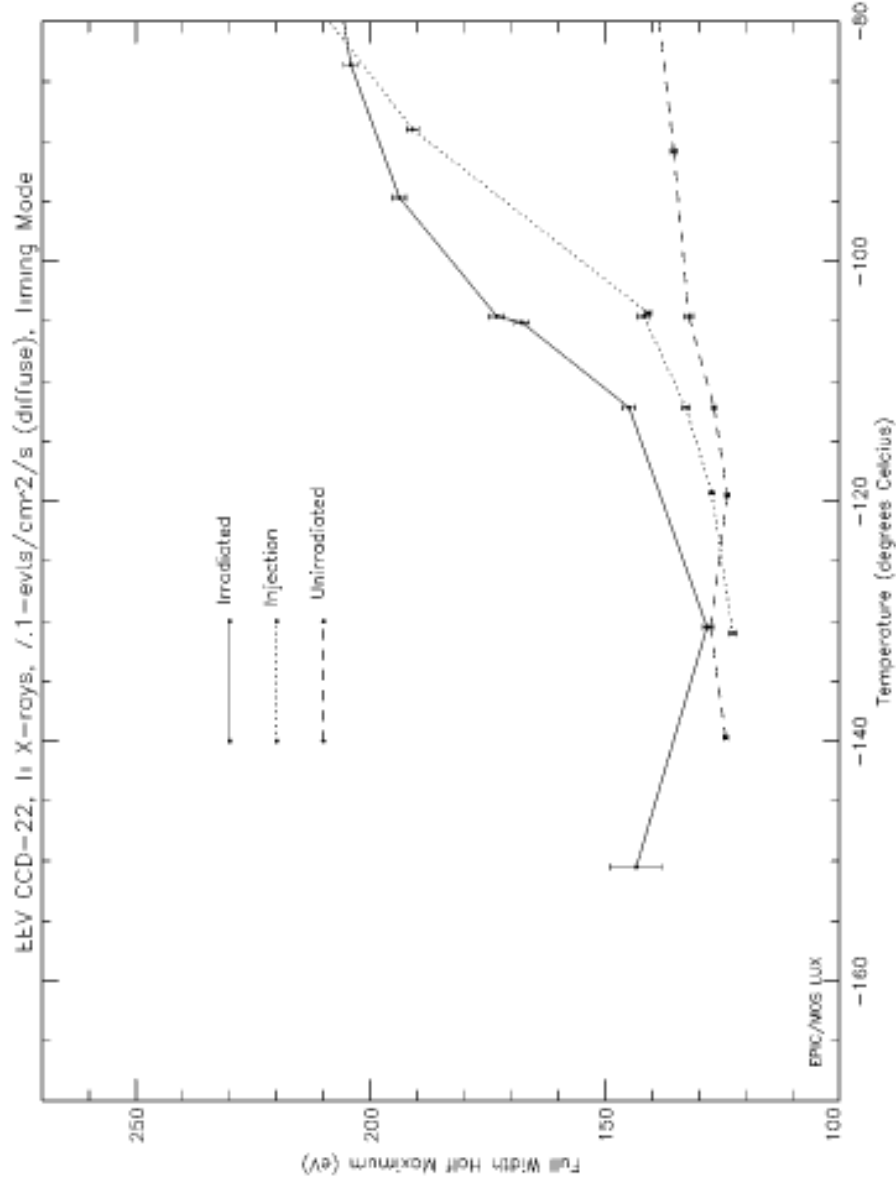

Effect of operating temperature and charge injection on CCD-22 in full frame mode

CCD resolution after proton damage (2.5E8 10MeV equivalent).

Effect of operating temperature and charge injection on CCD-22 in timing mode

CCD resolution after proton damage (2.5×10^8 10MeV equivalent).
